(die cut)

Seventeen years of setting the standard of comfort, durability, and features with expedition packs has brought us the opportunity to bring these same offerings to our new daypacks. Our Access packs allows you to utilize our heritage of quality product with shorter backcountry excursions, and our Street series gives you unparalleled fit and organization for your urban adventures.

Durability, Comfort, and Modularity with features are just a few of our tenants. We offer product that focuses on the adventure at hand today, but also can excel with your next weekend's excursion.

Second-guessing is never reassuring. Our product inspires confidence in it function; tested and proven with 17 years of heritage behind them our packs offer unparallel comfort and durability while still remaining weight savvy and technology driven. After all, customer service and warranty departments aren't 13miles in from the trailhead.

Why Dana Design

We use this stuff ourselves. Would you design Habanero eyedrops? We wouldn't either. So for 17 years we've been using and building packs, as well as listening and learning from our fellow enthusiasts as to what essential features are needed to give each of us the warm and fuzzies when out in the cold and prickly elements. We all like to get out and have fun, so a pack that's durable and versatile is a key starting point. And while we all live in different places, one thing remains constant: Human Power. Which means that having a pack that lets you haul your toys (and summit treats) without adding a bunch of its own weight is vital. We then make sure that these packs are comfortable for everybody out there, no matter what their shape, and then it's up to you to decide where you're going to end up.

Quality is implicit. Sure it looks good on display, but have you seen this stuff up close? Whether it's weight-savings, material integrity, or just plain old safety, we've tested each design exhaustively to insure that we have precisely examined every feature so that they will each do their job in concert with one another and seamlessly. After all, you don't want to think about saying, "Whoops!" when you're in the shadow of some unpronounceable peak in a country that you can't remember from your 5th grade Geography class. Yes, we want YOU to be comfortable using our toys, but WE want to be comfortable using our toys too.

At Dana we work hard, but we play hard too. Since our work helps us play and vice versa, we eagerly go through each generation of prototypes and make the right tweaks. Every round of testing, good or bad, we figure out how that affects future designs and adjust from there. By the time our product hits the store we've streamlined the features and materials to the point that you and we both know that this is a product that will outlast everything else in your gear inventory, even those stinky-but-oh-so-comfortable boots that you just can't bring yourself to get rid of.

two

Arc Series

If you don't feel 100% certain that you're ready for the upcoming expedition, take the Arc Series pack, because it is ready. We've all been there. Your schedule got bonkers leading up to the departure date, and now you wish you were a little more prepared... like our Arc Series packs, which are ready and just waiting for Go Time. They're cavernous to the point that finding a clean and dry pair of socks will become a treasure hunt, and you can rest assured that it will haul those loads that make you wonder how long your body is going to hold up. With superior fit adjustability and our ArcActive components the Arc Series packs utilize, you know your body will hold up (and even enjoy the ride) the next time you might have one of those unprepared moments.

astralplane

*7 lbs 12 ozs / 3.3 kg
7000 cu.inches / 115 litres
black, paprika
x small small medium large x larger

The Astralplane is for a separate reality. A place of ice, snow, wind and vast mountain ranges; the land above 10,000 feet. The Astralplane carries large loads in sync with your body - making it the favorite of many wilderness school instructors and backcountry guides.

D03103

terraplane LTW

*6 lbs 9 ozs / 3.1 kg
5800 cu.inches / 95 litres
carbon blue, deep green ,titanium
x small small medium large x larger

Another one of our monster load haulers, the Terraplane LTW is only slightly smaller than the Astralplane. Double vertical back pockets provide easy access to your on-trail items. The wand/bottle pockets are removable for added flexibility.

D03101

alpine LTW

*6 lbs 7 ozs / 3.1 kg
5000 cu.inches / 82 litres
black/black, paprika/flint
x small small medium large x larger

The Alpine is the most versatile mountaineering pack available. The bottom is retractable to create a smaller profile pack for day climbs and summit pushes. All the necessities are included: Ice axe loops, daisy chains and compression straps. We've made the wand/bottle pockets and the dual daisy chain Shov-it removable for added adaptability.

D03102

Brief

Cavernous, burly, and featuring the most comfortable & adjustable suspension systems incorporating our ArcActive technology, these packs are expedition ready. When it's time to haul your expedition tools and toys to your designated play area, make sure that your pack will keep pace with you. These packs are designed for the monster loads. What are you designed for?

glacier

*5 lbs 13 ozs / 2.6 kg
5200 cu.inches / 85 litres
black, bronze, carbon blue
x small small medium large x larger

Our Glacier is a lightweight workhorse. With loads of carrying capacity, the Glacier adapts to the needs of most extended excursions. The double back pocket and divided bottom create packing flexibility while maintaining a narrow profile.

D03104

bridger

*5 lbs 2 ozs / 2.3 kg
4000 cu.inches / 66 litres
paprika, deep green, bronze
x small small medium large x larger

The pack many backpackers, thru hikers and backcountry skiers are turning to as their personal favorite. The double back pocket provides packing flexibility while maintaining a narrow profile. The Bridger includes a lid that converts to a waist-pack, a mesh Shov-it pocket and an integrated hydration sleeve and high back exit ports.

D03106

bomber

*4 lbs 13 ozs / 2.2 kg
3200 cu.inches / 52 litres
black, paprika, titanium
x small small medium large x larger

Another Dana Design classic. Incorporating our Arc Active Suspension technology, efficient moisture management, fixed ski loops, convertible hip-lid and an integrated hydration sleeve make this old favorite a "must have" on everyone's list.

D03105

Access

Day hike? Check. Backcountry with your descent tools of choice? Sure. Followed by an assault on Mt. Stubby, roger that. Look-it's hard enough to make the time for all you wanna do, don't waste more time worrying about whether your pack is going to pass the test of the day's endeavors. And what about all the other weekends? With year-round durability and everyday versatility, these packs will grant you and your gear access to all of your favorite secret spots. They also have tomorrow's adventure in mind as they keep you comfy today with their fully active suspension that we built our heritage on. We'll get you there, you get us back.

Mazama is a small town at the edge of the spectacularly glaciated North Cascade mountain range and provides a perfect launch pad for backcountry ski excursions. The Dana Mazama pack utilizes the Arc Active suspension enabling you to carry medium to large loads in true Dana Design comfort.

Sluiskin was a Yakima Indian that guided Hazard Stevens and PB Van Trump to timberline for the first successful ascent of Mt. Rainier, Aug. 17, 1870. If you're a multi-sport adventurer this is the pack for you. The Sluiskin comes fully loaded with axe loops, tool loops, a removable Shov-it® pocket and more.

Sluiskin was a Yakima Indian that guided Hazard Stevens and PB Van Trump to timberline for the first successful ascent of Mt. Rainier, Aug. 17, 1870. If you're a multi-sport adventurer this is the pack for you. The Sluiskin comes fully loaded with axe loops, tool loops, a removable Shov-it® pocket and more.

Tatoosh, a small but impressive range just to the south of Mt. Rainier is known for it's quick access to numerous scrambles, ski tours, climbs, and striking views. Our Tatoosh 35, originally designed as the ultimate backcountry ski pack is another versatile all around pack for use climbing, skiing, or touring in the backcountry.

The Tatoosh 15 is a smaller version of the 35 with the same features and functions for smaller backcountry loads. The ultimate in or out of bounds ski pack that also doubles for summer hikes or bike rides.

black, carbon blue, deep green
small medium large

A rugged granite peak in the Enchantment Lakes region of the Cascade range, it has everything you'll need to put this pack through the paces: steep couloirs, hard rock routes and a cascading glacier. Our Colchuck is a versatile all around pack with it's primary design for use tracking down that illusive corn patch with a snowboard or skis.

The Salish Indians spread from Bella Coola, BC in the north to the Columbia River in Oregon, and from the Washington coast all the way to Montana. They spoke 23 different languages and over a hundred dialects. Our Salish pack is a more traditional top loading pack with enough space for a rack and a rope or lunch, some extra layers and a camera.

Tokaloo Spire is one of the few opportunities for rock climbing in Mt. Rainier National park. Our Tokaloo is the ultimate pack for ultra-light packing, climbing, commuting to the office, or short day trips into the backcountry.

Daypack or day trip? You get to decide if you'll use it in the foothills or around town. The Lone Trail gives you load control and the volume in a waistpack to handle day-to-day loads.

Our Ridge Run is a runner friendly waistpack with for the streets or out on the trail. 310 cubic inches of space for extra food, a leash for Fido or any other number of items.

T9 Series
Simply put, men and women are the same, but different. Both enjoy what Mother Nature has to offer, and a little downtime in the untamed areas does nothing but good regardless of one's gender. However, the dimensions of the overall design change slightly between sexes (this was reviewed in your middle school health class, remember?), and this series dimensions compensate for that difference. Our *T9* packs, designed for woman with the help of female engineers & researchers, keep our proven *ArcActive* technologies but differ to address a woman specific fit. These have the solid Dana quality you love with similar features you trust, but slight volume tweaks to aid with female's lower center of gravity, and harnessing construction that embrace a women's body. So yeah; the same, but different.

Brief
Its not that women don't have any different outdoor interests than men, it just everybody has different bodies. The *T9 Series* grasps female differences in harnessing and volume placements. This means you don't have to mess with making a uni-sex harness fit your mono-sex body and focus your entire female being on the adventure at hand.

Trail Series
We've taken our expedition tested designs and distilled them down into a functional value oriented series we're calling the trail series. These packs are built with the quality and function you always receive from dana with a more recreational user in mind. Fixed adjustable suspension system available in two sizes provides the fit you expect from a dana pack. We offer four styles ranging from the t 2000 (approx. 200in³) for short trips to the t 4000 (approx. 4000 in³) for multi day excursions.

Adventure Series

The name says it right there. Adventure. Sure, you want to get to the wild international places (the whole reason for globetrotting), but sometimes getting to the foreign playground's trailhead is a long haul in itself. Flights abroad, missed connections; embarrassing language blunders, and all the friendly handling that comes from airline workers. It's a Dana Design pack, so you know it's all about bomber quality and comfort but these packs are also super travel-savvy. Versatile rolling duffels for coast-to-coast hauling that can fit your kitchen sink (for those that bring them), and well sized backpacks with modular volumes & components for those 3 months in Europe or Chile or Laos or Madagascar or _____.

swift traveler

*7 lbs 8 ozs / 3.4 kg
*6,300 cu.inches / 103 litres
black, deep green
small medium large
*for a medium size pack

Originally built for a South Polar Overland expedition we took some years ago this humongous wheeled duffel will carry darn near everything you own anywhere you choose. You'll be on your way happily rolling along, provided you've successfully negotiated your way through customs and/or security.

D041101

far flung

*5 lbs 13 ozs / 2.64 kg
*3800 cu.inches / 85 litres
black, deep green
small medium large
*for a medium size pack

The Racer X continues to perform both on and off the racecourse. If you're attempting to go ultra light this is the pack for you. Combined with our 25-liter dry bag you won't find a more comfortable lightweight pack on the planet.

D041102

Specialist Series

You know you can get there, that’s the easy part. You’ve accepted those logistics of wearing the same socks all the way there and back, regardless if it is 4 days or 14. Whether is it is blazing through your 3-month thru-hiking itinerary, or traversing the some rowdy ski mountaineering route; super-techy canyoneering or light-speed alpinism, we don’t call it “narrow-minded”, we call it being a *Specialist*. These unconventional packs are focused in their purpose for you to push your limits, and by traveling light but still comfortably, who knows where you’ll end up finding those limits. Think of these packs as the *Go-Go-Gadget* cape to your Superhero/ine outfit.

Street Series

Okay sure...Urban Jungle is a cliché. But have you ever been in the designated cross-walk with one of those accordion-buses and a hopped-up cabbie both jockeying for your particular space-time coordinates? Pedestrian right-of-way is sometimes a moot point. Our Street Series packs are there for the Urban Contingent so that your office/school/cyber needs will be met in true Dana comfort and style. That'll of course be a plus not ever having to worry about looking and feeling good when a brisk trot (or dead run even) is needed to get you to the other side of the street.

Brief

We all need a few vital daily items with us at all times. Street Series pack will keep your personals on you and in solid working order, whether the day has you in the office, classroom, heading about town, or getting some mileage in. You know what you need, we know where you can put it.

The ultimate wheeled duffel. A large horsehoe opening allows you to get plenty of gear in these and easy access to what's inside. Skate wheels and internal cross bars make for smooth rolling over any terrain. Our Endless Road Duffels can take you any place you like, on wheels.

D03143

The Wet Rib gives instant access to a water bottle, snacks, bear spray; anything you need to get at without removing your pack. We built them in big and small sizes and shape them for the right or left side. Ambidextrous? Use both.

Specialist Series

Our necessity pocket adds organization and volume to your pack. Plenty of extra volume and multiple attachment points to fit the needs of any explorer.

Warrenty Copy If you don't feel 100% certain that you're ready for the upcoming expedition, take the Arc Series pack, because it is ready. We've all been there. Your schedule got bonkers leading up to the departure date, and now you wish you were a little more prepared... like our Arc Series packs, which are ready and just waiting for Go Time. They're cavernous to the point that finding a clean and dry pair of socks will become a treasure hunt, and you can rest assured that it will haul those loads that make you wonder how long your body is going to hold up. With superior fit adjustability and our ArcActive components the Arc Series packs utilize, you know your body will hold up (and even enjoy the ride) the next time you might have one of those unprepared moments.
